

Google Nano Banana 2 Prompt Pack

Compact Edition

50 Mixed High Impact Prompts

Recommended Structure for Nano Banana 2

1. Subject
2. Environment
3. Era or aesthetic
4. Lighting and mood
5. Texture and realism notes
6. Extra constraints like consistency, physics, or logic

50 Prompts

1. A 1994 electronics bench blueprint with worn vellum texture and faded ammonia lines under fluorescent lighting.
2. A Mumbai workshop at sunrise with dusty golden beams hitting scattered metal tools in ultra realism.
3. A cyberpunk detective with neon jacket in a rain soaked alley showing three emotional variants.
4. A floating fantasy city above emerald clouds with dragon shaped airships and complex god ray lighting.
5. A martial artist frozen mid air kicking through a wall of suspended water droplets.
6. Extreme macro shot of an ancient engraved silver coin with dust packed in grooves.
7. A high fashion model wearing liquid fabric and mirror shards in a photo editorial setup.
8. A Scandinavian forest during first snowfall with cold mist and soft blue ambience.
9. A futuristic market with hundreds of unique characters and layered neon holograms.
10. The same scene rendered in oil painting, graphite sketch, and Pixar animation with consistent layout.
11. A quantum engine room with rotating energy rings and polished metal reflections.
12. A single scene shown at sunrise, afternoon, dusk, and midnight with identical framing.
13. A cathedral built from refractive jelly glass with unpredictable caustics.

14. A detective board with forty clues, strings, photos, and coherent narrative logic.
15. A twenty kilometer desert highway with crisp objects at multiple depth ranges.
16. A face morphing into a lion across eight smooth transitional frames.
17. A drone view and ground view of a labyrinth maintaining perfect spatial consistency.
18. A Mandelbrot fractal transforming into a cathedral blueprint.
19. Three parallel universes separated by thin membranes on one poster.
20. A room with five mirrors creating accurate infinite reflections.
21. A portrait conveying bittersweet nostalgia through micro expressions.
22. An Escher inspired museum that still obeys real light and physics.
23. A city generated from a fifteen point written description with precise placement.
24. A melting neon sculpture collapsing realistically across five stages.
25. Two characters in different locations reacting to the same event simultaneously.
26. A nightclub with fog, complex beams, and two hundred dancing silhouettes.
27. A 1996 robotics club blueprint on worn graph paper with fan shadows.
28. A 1992 car engine blueprint with oil prints and warm halogen lighting.
29. A pager prototype plan with UV discoloration and crooked staples.
30. A physics chalkboard showing precise refraction diagrams with chalk dust in the air.
31. A chemistry board with half erased equations and overhead tube light reflections.
32. A biology frog dissection diagram with rotating fan shadows.
33. An electromagnet lesson diagram with chalk grain breakpoints and daylight bands.
34. A baking soda volcano board with mixed chalk colors and curling taped sheet.
35. A Gemini architecture chalkboard with multi modal diagrams and dust.
36. A ChatGPT architecture board showing transformer blocks and ghost writing.
37. A Grok explanation board with bold chalk lines and humor side notes.
38. A Kimi 2 chalkboard showing long context windows and colored attention heads.
39. A hyper realistic 90s blueprint of a game console motherboard on aging paper.
40. A soft cinematic classroom board describing AI reasoning chains.

41. A detailed creative industry workflow diagram from the 90s using chalk and markers.
42. An experiment board showing chaotic energy patterns drawn with multi colored chalk.
43. A blueprint of a failed invention with messy handwritten corrections and tape marks.
44. A dim vintage lab with a blueprint pinned under glass and lit by a single desk lamp.
45. A timeline of AI evolution hand drawn on a chalkboard with uneven spacing.
46. An ultra detailed macro rendering of chalk dust particles on a board edge.
47. A science fair board mixing chalk, paper, thumbtacks, and doodles.
48. A dramatic low light chalkboard scene explaining attention heads with glowing edges.
49. A surreal 90s style blueprint of impossible geometry rendered realistically.
50. A classroom board combining physics, chemistry, and biology diagrams with deep realism.
